

## Outdrives/Props

### Drivesleek

DRIVESLEEK™ is a high performance solvent-base outdrive antifouling that uses a high-end technology of Zinc Oxadine & Zinc Oxide. DRIVESLEEK™ provides full season antifouling protection against barnacles, algae and hydroids in salt and fresh water on props, propellers, shafts, bow thrusters, rudders & trim tabs. Its copolymer base renders a smooth finish with durability and abrasion resistance. DRIVESLEEK™ releases biocide by the constant exposure of new paint film to the water. DRIVESLEEK™ has universal application over all types of properly prepared outdrive paints. For use on aluminum, steel, bronze, and all underwater metals.

### Propsleek

Propsleek™ is a silicone foul release coating that prevents fouling attachment. A clear coating 1-part aerosol that contains no copper or tin compounds, and is perfect for propellers, running gear & stern drives. Long service life and easily recoated.
