The miracles of science™

ColorNet® Formula Retrieval System

Unlike microfiche and DOS-based formats, ColorNet provides your shop with fast, powerful and easy-to-use solutions for color retrieval. If you do not currently use Microsoft® Windows® to run your ColorNet program, now is a great time to upgrade. Only users of ColorNet for Windows can fully reap the advantages of the following revolutionary products:

- **VINdicator™** – The first and only system that correctly identifies a vehicle's color based on its vehicle identification number (VIN), removing variability from the entire process. In less than a minute, you can find a reliable match. This color-retrieval solution helps DuPont Performance Coatings customers easily and efficiently select the right ChromaSystem™ base-coat formulations. Bottom line: It's a simple alternative to older and confusing formula-retrieval tools.
- **ChromaVision®** – "One of the industry's greatest developments during the last 20 years." That's just one of the things that have been said about ChromaVision, a portable, hand-held, color-measurement instrument. While VINdicator pinpoints the color formula, ChromaVision further adjusts it with advanced fiber-optic technology. ChromaVision looks deep into the paint's specific color characteristics, precisely matching solids and alleviating difficulties with complicated metallic, pearl and other effect colors.
- **X-Pert™** – This state-of-the-art paint-mixing system completes the DuPont color tools synergy. X-Pert is the collision repair industry's first computerized paint pouring system – designed to save you considerable time and money. Marketed exclusively by DuPont Performance Coatings, X-Pert can be used successfully with DuPont Automotive Finishes products. Extensive testing and research have consistently shown that X-Pert increases productivity and reduces rework.

Teamwork is at the heart of the Color Solutions system. When applied collaboratively, ColorNet with VINdicator, ChromaVision and X-Pert produce the best possible outcome for you, and for your customers.

Performance-Driven Paint And Painters

Survival in the current collision repair market demands performance-driven paint and painters. That's why we offer exceptional paint brands and systems, as well as in-depth product training for painting professionals.

Our first-rate automotive products – including ChromaPremier® and ChromaBase® base coats, ultra-productive primers and Hyper-Cure™ clear coats – boast beauty, versatility and durability. Plus, they're backed by a broad selection of comprehensive warranties. Your painters can also benefit from national training centers in Atlanta, Georgia; Lionville, Pennsylvania; and Pomona, California. Additionally, we are aligned with Universal Technical Institute in Houston, Texas, and many vocational schools for regional training – giving your painters access to the highest level of certification.

An Affordable Price, A Solid Return On Investment

The Color Solutions tools are customized to fit every type of body shop. Regardless of your shop's size, location or standard operating procedures, Color Solutions will give you a flexible, affordable and user-friendly answer to the industry's color-matching challenges. Whether purchased individually or as a package, ColorNet® with VINdicator™, ChromaVision® and X-Pert™ yield a solid return on investment.

Better For You. Better For Your Customers.

The Color Solutions system helps your business in two ways.

- **You'll expand your expertise.** With superior products, state-of-the-art tools and value-added services, DuPont can advance the way your shop does business. We can help you improve your internal processes to make you more efficient, more competitive and more successful.
- **You'll enjoy a competitive advantage.** We'll show you how to demonstrate to vehicle owners that DuPont's products and color tools are of the highest quality – and that anything less would be a compromise. Even more important, by giving you everything you need to create a dazzling color match, DuPont can assist you in keeping every customer satisfied.

The Color Solutions system is just one of the many outstanding products available from DuPont Performance Coatings and its family of brands, including DuPont Automotive Finishes. All of our products are backed by extensive research and cutting-edge technology to bring a wide range of solutions to customers around the globe.

Find out how you can show off every vehicle's true colors today. Contact your distributor or call 1-800-GET-DUPONT to determine the perfect solution for your shop.

Precise Tools For A Great Match

When it comes to the process of color matching, variance is unavoidable. Color shifts from plant to plant. Different vehicle model years. Technical modifications. Application alterations. Even your most experienced painter can face more than a dozen color variants during a single collision repair job.

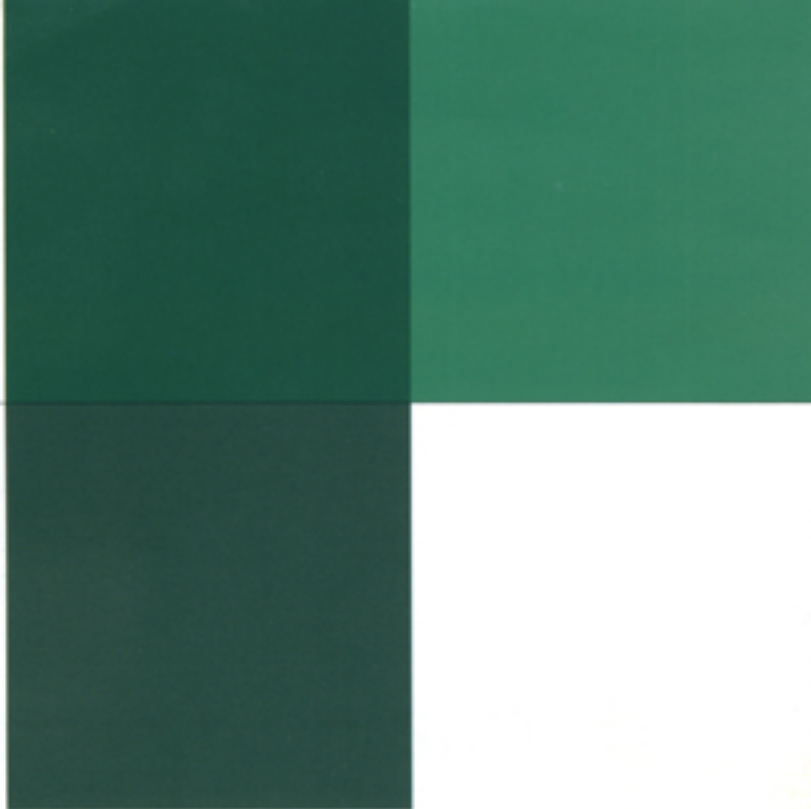

With so many opportunities for error, it's not surprising that mistakes are sometimes made. The good news is that DuPont™ Color Solutions can give your highly skilled painters the tools they need to get the perfect match – every time. We know that your painters understand automotive painting better than anyone else. We're here simply to help them overcome today's industry challenges. The results? Satisfied customers. And an even more satisfying bottom line.

One Proven System For Lasting Savings

The collision repair industry is an exciting, profitable sector of the automotive aftermarket, for body shop owners and painters alike. Yet there are many obstacles that can lead to unsatisfied customers, reduced productivity and missed profits.

DuPont Color Solutions will enable you to rise above these common business barriers. No other company features this proven color-matching system. Working together – from mixing to application – the tools in our system will significantly increase color-match speed and accuracy, ensuring lasting savings for your shop.
