Color retrieval –
quick and easy.

ColorNet® is a user-friendly, software platform designed specifically to make color formula retrieval and reporting quick and easy. It utilizes technology to enhance our extensive color expertise and provides features such as ChromaVision®, VINdicator™, cost and VOC tracking, inventory management and a variety of reports.

ColorNet Formula Retrieval System

DuPont customers may choose from an entry-level version of ColorNet, known as Mini ColorNet, or Full ColorNet, which offers additional features such as management, VOC and cost tracking reports and access to OrderNet™.

Full ColorNet includes:	Mini ColorNet includes:
· Car/Code/Year Look-Up	· Car/Code/Year Look-Up
· Formula Number Look-Up	· Formula Number Look-Up
· VINdicator™	· VINdicator™
· Fleet Look-Up	· Fleet Look-Up
· Cross Reference	· Cross Reference
· ChromaVision®	· ChromaVision®
· Special Color Library	· Special Color Library
· Formula Scan	· Formula Scan
· Formula Comparison	· Formula Comparison
· Formula Recovery	· Formula Recovery

· Repair Order Paint & Materials	
· VOC Tracking	
· Customer Address Book	
· Inventory Reports	
· OrderNet	
· Mixing Color Management	
· Mixing Color Labels	
· Mixed Color Management	

Color matching –
quick and easy.

DuPont customers with ColorNet® can utilize exclusive color measurement, selection and mixing tools that are designed to work together flawlessly. From a portable color measuring system to a computerized paint pouring system, DuPont ColorNet helps make the most accurate color matches.

VINdicator™ Formula Selection Technology

The first and only system that correctly identifies a vehicle's color based on its vehicle identification number (VIN), removing variability from the entire process. In less than a minute, you can find a reliable match. This color-retrieval solution helps DuPont Performance Coatings customers easily and efficiently select the right ChromaSystem™ base-coat formulations. Bottom line: it's a simple alternative to older and confusing formula-retrieval tools.

ChromaVision® Color Measuring Instrument

"One of the industry's greatest developments during the last 20 years." That's just one of the things that have been said about ChromaVision, a hand-held, color measuring instrument. While VINdicator pinpoints the color formula, ChromaVision looks deep into the paint's specific color characteristics, precisely matching solids and alleviating difficulties with complicated metallic, pearl and other effect colors.

X-Pert™ Paint Mixing System

X-Pert is the industry's first computerized paint mixing system, which allows you to mix color formulas accurately and productively, time after time. It helps eliminate costly overpours, reduces paint waste and saves time and money by being correct the first time, every time.

The X-Pert system works with ColorNet and consists of a hydraulically operated dispensing unit and specially designed mixing lids. The system connects to the ColorMix scale.
