

A Revolution in Color-Matching Technology

The fastest, easiest and
smartest way to get exactly
the right color.

The miracles of science[™]

Get more accurate ChromaSystem™ basecoat color matches with VINdicator™ from DuPont Performance Coatings.

We understand color variation. Whether it's color changes from plant to plant, technical modifications, application alterations or simply moving from one model year to

another, variance is unavoidable. And that can be a real problem for collision repair shops. To get the best finish, you need a process to match the variation.

Got a minute? Get a match.

Years of research and testing have gone into VINdicator™, a patent-pending color retrieval solution designed to help DuPont Performance Coatings customers easily and efficiently select the right ChromaBase® and ChromaPremier® basecoat formulations. Appropriate for domestic and import vehicles, the VINdicator™ program provides superior color matching for 98% of vehicles sold in the United States and manufactured since 1997.

VINdicator™ offers a simple, no-cost alternative to expensive and confusing formula-retrieval systems currently available to refinishers. It's the first and only color-matching system that removes variability from the process, making it the most accurate color match.

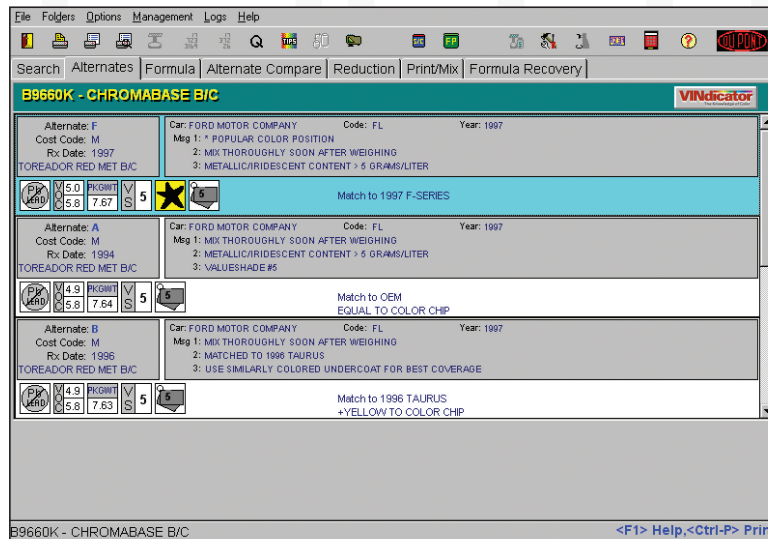

More reasons to step up to VINdicator™

- Improves cycle time through the body shop
- Eliminates the time-consuming process of matching against chips and alternate decks
- Reduces labor hours spent on re-work
- Reduces material cost
- Increases shop productivity
- Provides more accurate color matches without investment in more equipment or people
- Increases customer satisfaction

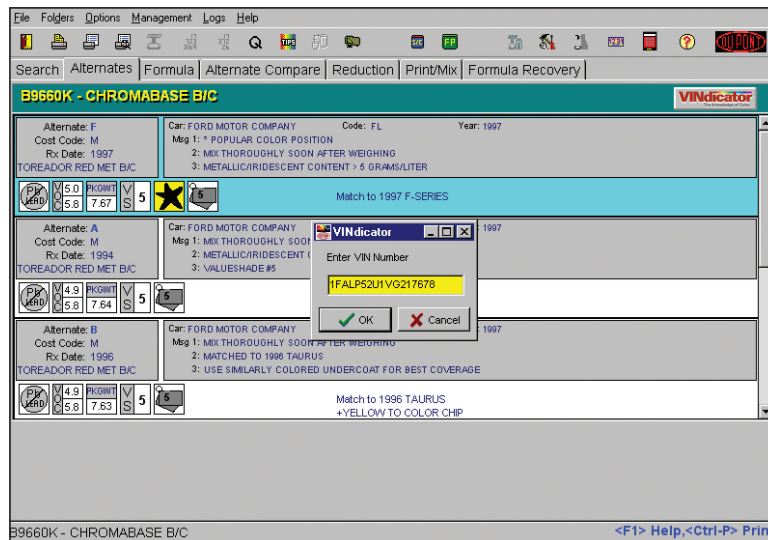

It's easy to find the right color!

VINicator™ is available for use only with the ColorNet® program for Windows®. If you do not use Windows to run your ColorNet® program, now is a great time to upgrade. Only Windows users can take advantage of this revolutionary color-retrieval system.

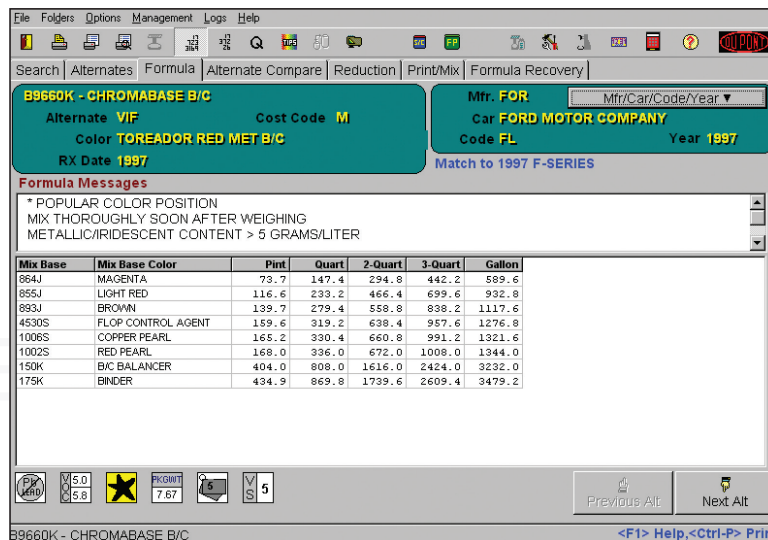

ColorNet® just got smarter. With VINicator™, you get the fastest, easiest and most accurate ChromaSystem™ basecoat match available.

Fast.
After selecting a stock code from car/code/year search, a tab labeled VINicator™ will appear in the upper right corner of your screen. If a VINicator™ color match is available, the VINicator™ tab will appear in bold type, indicating that the link is enabled. If data are not available, the tab will appear in normal type, and you can proceed as you normally would if VINicator™ were not available.

Easy.
Click on the enabled tab, and a prompt will appear. Simply enter the 17-character VIN in the pop-up screen.

Smart.
The closest available color option is displayed instantly.
