

Mix to the most exacting standards—yours.

X-Pert™ Paint Mixing System, a revolutionary tool designed specifically to help today's leading body shops and collision repair centers do one thing—get accurate color mixing, every time.

Because it doesn't take much to ruin a paint match.

In fact, an X-Pert study of manual pours revealed that 64% of manual pours had some degree of error, and 9% of those pouring errors were off by 20% or more which led to significant mismatches in color and the need for new paint to be mixed.

Eliminating over pours increases accuracy and reduces waste.

That's why the X-Pert Paint Mixing System is computer-controlled for greater accuracy. It links your color retrieval system (including DuPont™ ColorNet®, Standox Univers® or Spies Hecker Wizard™) - directly to the mixing dispenser. An easy to follow user interface allows you to select the variant or alternate color formulas adjusted during the color retrieval process, and set the amount needed.

The result is an accurate pour that significantly increases color matching accuracy—saving your shop both time and money.

1 SELECT A PAINT FORMULA WITH YOUR COLOR RETRIEVAL SYSTEM.

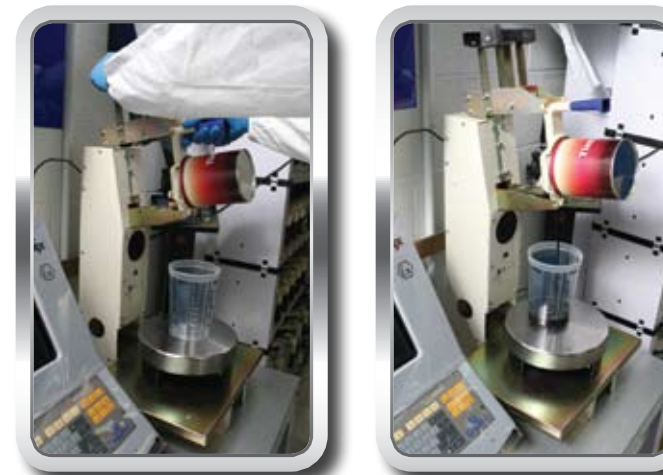

X-Pert works with DuPont ColorNet, Standox Univers and Spies Hecker Wizard systems to ensure that the most accurate color formula is mixed.

2 LOAD TINT/TONER AND POUR.

Place paint can on scale and load tint/toner into the hydraulic dispenser. The patented tint/toner lid allows for precise control over the pour.

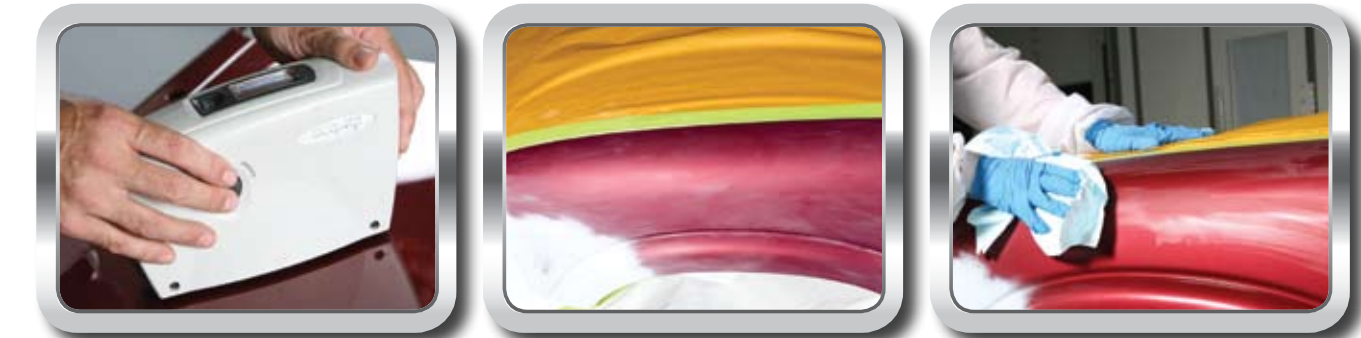

As the amount of tint/toner reaches the end, the pour is controlled to ensure a precise stop and eliminate over pours.

3 START PREPPING THE NEXT JOB WHILE X-PERT DOES ALL THE WORK.

Because the X-Pert system is completely automated, painters can apply the time that used to be spent on manual pours to prep for the next job, or complete other shop tasks.

And because X-Pert is so easy to use, you can train paint mixing specialists in far less time, allowing your shop to run even more efficiently.

HOW TO ORDER

For more information on the equipment needed, or to order your X-Pert Paint Mixing System, just give us a call.

DuPont Performance Coatings
Jobber: 1-800-3-DUPONT
Shop: 1-800-GETDUPONT
In Canada: 1-800-668-6945
or contact X-Pert directly at 1-888-345-8232

Nail it. Every time.

Increased Profit! - *"It'll save you money, pick up production and make sure you get accurate paint right from the start."*

Increased Productivity! - *"Because of the X-Pert™ system, painting bumpers has also become a faster process. We can now have a vehicle come into the shop for an estimate, take a camera reading of the color and have the bumper ready for the vehicle before it arrives for repairs."*

Increased Competitive Advantage! - *"It's very simple to learn and anyone can use it, which makes it easy to get new employees up and running quickly."*

Happier Painters! - *"More than anything, it gives me the ability to do something else while it's mixing. I can be spraying in the booth while tint for the next job is on X-Pert™."*

X-Pert™ Paint Mixing System, Inc.
Nail it. Every time.
