

## Drilling/Screwdriving

### **C12: Cordless Drill**

The very compact, remarkably light C12 offers all the power, control, torque, and features you need for demanding jobs. It's the lightest 12v on the market and the first cordless drill with a brushless motor. Lift a pound less each time you drill or drive without sacrificing any power. That's 200 fewer pounds in a typical day. As for longevity, the C12 will drive up to one million screws before it needs to be replaced.

### **TDK 12: Cordless Drill**

The very compact, remarkably light TDK offers all the power, control, torque, and features you need for demanding jobs.
