

Multifunction Tables

MFT 1080 Multifunction Table

A strong, sturdy, portable worktable for clean cuts and precise angles. Enables a Festool plunge saw to function as a chop saw, radial arm saw, and miter box. When used with the Festool router and Festool saws, exact repeat operations are performed with ease.

MFT 1080 Basic Multifunction Table

The MFT Basic is a strong, sturdy portable work table that provides a large support area for small and large workpieces. It features foldaway legs for quick and easy setup and breakdown and is easy to store when not in use. The holes in the MFT Basic and the rails can be used with different clamps (optional) for securing workpieces while routing, sanding, planing etc. The MFT Basic comes in two sizes. The smaller unit (MFT 800 Basic) has a work area that measures 23"x 28", the bigger unit (MFT 1080 Basic) has a work area that measures 28"x 45". Several tables can be joined with table connectors to create even bigger working surfaces
