PACKAGING
Available in 1 liter cans – 280 g

PRODUCT FUNCTION
Acrythane Texturecoat Additive is designed to produce a textured surface when mixed with Acrythane XSC paint systems. This product is available in both a fine grain and a medium grain. The greater the addition, the greater the texture. Can also be used with K Type Polyurethane Paint.

TECHNICAL INFORMATION		APPLICATION AND USAGE DATA	
Flashpoint	Not Applicable	Suggested Mixing Ratio (user to satisfy him/herself)	120 g or 4 oz. of texturecoat additive Per 1 US Gallon of mixed Acrythane Ready to use product.

COLOR RANGE
Not applicable

SPECIAL PROPERTIES
Provides operators the ability to create an anti-slip textured surface.

PREPARATION
Not Applicable.

HOW TO USE

<input type="checkbox"/> Airless	<input type="checkbox"/> Brush	<input type="checkbox"/> Conventional Spray
<input type="checkbox"/> Roller	<input type="checkbox"/> See application data	

APPLICATION
Mix with Acrythane 2 pack systems in a suggested ratio of 120 g or 4 oz. of texturecoat additive to one US Gallon of ready for use product. This is a suggested ratio; the user may add more or less additive to suit their individual needs. Mix thoroughly before using. If using a standard spray gun air pressure should be set at approx. 60 PSI. Test a small area to ensure the finish is satisfactory. An alternate method of application is to sprinkle particles onto a tacky paint film. This can be achieved by broadcasting the particles through a coarse sieve. Then encapsulate them with a sealer coat of Acrythane that does not contain the particles

HEALTH AND SAFETY

- Refer to MSDS and can label prior to use.
- KEEP OUT OF REACH OF CHILDREN.**
