

## General Cleaning

### **Boat Washing:**

To maintain your boat's appearance between waxing, we recommend a weekly washing. Besides keeping her always ready and looking ship-shape, a regular boat washing will protect your boat from salt, diesel fuel, bird & bug droppings, acid rain, dirt, and dust. An added bonus is it will help protect your boat from the long-term affects of environmental pollutants.

Here is a general outline of what should be included in a boat washing:

1. Wash and chamois-dry your boat from the tuna-tower down including the transom.
2. Vinyl windows cleaned
3. Exterior metal (aluminum/stainless) wiped down and dressed as needed.
4. Vinyl seats cleaned and dressed.
5. The fly bridge and cockpit wiped down and windows cleaned.
6. Exterior carpet vacuumed.
7. Nonskid cleaned and dressed as needed.

### **Interior Boat Cleaning:**

Interior boat cleaning should include:

1. Interior of boat wiped down.
2. All wood is cleaned and dressed.
3. Heads cleaned.
4. Interior carpets vacuumed
5. All stainless and chrome polished
6. Refrigerator and stove cleaned
7. Drawers cleaned-under and over.
8. Windows, mini-blinds and mirrors are cleaned.
