G126 - NXT Generation Car Wash**

Meguiar's® expertise in ESP technology has led to the development of a completely synthetic car wash concentrate that loosens and emulsifies even the toughest dirt and road grime with xtreme sudsing action. This pH balanced, non-detergent formula won't strip off wax protection and is gentle on all painted finishes as well as rubber, vinyl, and plastic components. Meguiar's NXT Generation® Car Wash is the first step to an amped up shine, and prepares your paint for an application of Meguiar's NXT Generation Tech Wax™.

G12718 – NXT Generation Tech Wax

After years of research into advanced polymer chemistry, Meguiar's® has created a wax powered by Engineered Synthetic Polymer (ESP) technology. The result, NXT Generation Tech Wax®, is the most technologically advanced synthetic protectant for paint available for today's modern finishes and clear coats. Our breakthrough formulation goes on and comes off easy without a powdery residue to visually eliminate fine swirls, protect against UV damage, and leave your finish "amped up" – with a deep, wet-look shine that is unbelievably intense. ESP technology creates a tough polymer bond for xtreme, durable protection.

G12824 – NXT Generation Tech Wax Spray

NXT Generation® Spray Wax is the fastest way to add gloss and protection with superior polymer technology. Create a deep, dark, wet-look shine with this easy spray-on formulation. For best results during application and removal, we suggest using our Supreme Shine® Microfiber or Ultra Plush Super Terry.

G12924 – NXT Generation Tech Protect

A specially engineered high concentration of ESPs blend with patented antiozonants to clean, condition, and protect all vinyl, rubber, and plastic surfaces in the car interior. The best all-in-one protectant on the market today, NXT Generation® Tech Protect delivers protection, durability and shine for car interiors. For best results apply with a High Tech Applicator Pad and remove any excess product with an Ultra Plush Super Terry or Supreme Shine® Microfiber.

G13005 – NXT Generation All Metal Polsh

NXT Generation® All Metal Polsh cleans, polishes, and protects all wheels, stainless steel exhausts, chrome air intakes and valve covers, aluminum, brass, copper, silver and all other bright work components. Meguiar's® Microscopic Diminishing Abrasive™ Technology (MDAT) removes built-up oxidation, tarnishing, and staining faster and safer than traditional harsh abrasives. Anti-corrosive technology locks in the shine. Use a High Tech Applicator Pad or Even Coat™ Applicator to apply and remove residue with an Ultra Plush Super Terry or Supreme Shine® Microfiber.
