

## **Pre-Paint Solvent Wipe**

Is a low VOC cleaner. It is a water-based cleaner/degreaser containing a unique blend of detergents and solvents that quickly and efficiently clean and prepare surfaces for painting. It is formulated to remove oil, grease, wax, silicone, sanding residue and other surface contaminants from bare metal, primer and plastic.

It greatly reduces static build-up, which helps check dirt nibs, and minimizes the need to wet sand and buff.
