

Standox Univers® and TopMix Color Retrieval System. Make color formulation retrieval fast and easy.

The TopMix terminal is an explosion proof color monitor and keyboard that sits between Univers and Sartorius' PMA scales. It connects directly to all Sartorius PMA scales, allowing users to access the full functionality of the Univers color retrieval software in the mixing room.

TopMix features a vibrant, backlit color display (800 x 600). It is Internet ready, meaning that if the user's computer is connected to the Internet, they can view Standox product and technical information on www.standoxna.com.

Features and Benefits

- Explosion proof (Class 1 Div 1 approved).
- Fully integrated keyboard and mouse for compact functionality.
- Multiple USB ports allow external devices such as a monitor, keyboard or mouse to be connected outside the mixing room.
- No special graphic adapter is required to support TopMix if the computer currently has a graphics card.
- TopMix is easy to setup and can be mounted to a tabletop or on a wall.
