

Standocryl® 2K Clear 15-60.

The fast lane to speed and quality.

User-friendly Standocryl 2K Clear 15-60 is the clear coat of choice for shops that require short bake and air drying capabilities.

It helps to increase shop productivity and throughput, while maintaining the premium European quality you expect from Standox. After just a 15-minute bake at 140° F, the finish is ready and you're ready for the next vehicle.

In addition, it's easy to apply and polish, provides excellent vertical holdout, and is particularly well suited for panel repairs and overall re-sprays.

Get in the fast lane to speed and quality.

Features and Benefits

- Versatile, easy application. Easy-to-spray clear coat that can be applied in a single coat application method.
- Optimum for short bake. Finish is ready after only a 15-minute bake at 140° F.
- Good film build. Desired film thickness can be achieved quickly in just 1 coat.
- Simple mix ratio. 2K Clear 15-60 is mixed 2:1 with Standox 2K Hardeners.
