

Standex® 2K Nonstop Primer Filler.

Proven Quality - Now available in Dark Gray and White!

This chromate-free filler has the same benefits of the existing version. It has outstanding isolating properties and adheres to primed and sanded panels, through-hardened sanded paintwork, clean and solvent resistant OEM e-coat, or sanded polyesters.

All the colors: light gray, dark gray and white, can be blended together to create various shades of 2K Nonstop Primer Filler, if desired. Already a proven part of many Standex OEM approvals, Nonstop Primer Filler just added another benefit to the Standex "workhorse" undercoat.

Features and Benefits

- Available in 3.5 L tins, the new white and dark gray colors can be blended with each other and the existing light gray version to create various shades of 2K Nonstop Primer Filler.
- Outstanding Isolating Properties. Adheres to primed and sanded panels, through-hardened sanded paintwork, clean and solvent resistant OEM e-coat, or sanded polyesters.
- Mix with Standex 2K Hardeners. Easily mixed with any 2K Hardener from 05-15, which is ideal for cooler temperatures, to 30-45, which is ideal for higher temperatures.
- Already a part of many Standex OEM approvals.
