.....

The systematic way to a perfect finish.

Refinishing with Stadox means simplicity and control. Our complete and precise product range is organized into easy-to-understand refinishing systems. The Stadox systematic approach to refinishing will streamline your operation and increase the productivity and profitability of your collision repair facility.

Our goal is to develop systems that improve refinisher efficiency. This means systems that are easy to use and products that cover completely in a minimum number of spray passes. When you use Stadox, you can expect products that are easy to use and apply. Your customers can be assured that the paint on their refinished vehicle is equal to the paint on the vehicle when it left the original manufacturer.

The products in the Stadox refinishing system work together. Each product is specifically formulated so that it bonds to other components and the suitable substrate, resulting in a perfect finish. Mixing competitive products with Stadox products can lead to a poor-quality finish and paint surface defects, resulting in re-dos, customer dissatisfaction and nullification of the Stadox warranty.

Take a look at how you can plan your success – systematically with Stadox.

The universal refinishing system from Standox that's VOC-compliant in most regulated areas.

Universal Standox® System

System Component	Key Product(s)	Characteristics
Cleaner (select one)	Standox Silicone Remover Antistatic	<ul style="list-style-type: none"> • Top-quality solvent-based cleaner • Removes wax and grease • Suitable for all temperatures and substrates
	Standohyd® VOC Silicone Remover	<ul style="list-style-type: none"> • Waterborne silicone remover • VOC-compliant for areas with cleaner limits
Stopper	Standox PE Rapid Stopper	<ul style="list-style-type: none"> • Multi-purpose polyester body filler • Universal applications • Easy to sand
Primer (select one)	Standox 1K Primer Filler	<ul style="list-style-type: none"> • 1K acid primer • Corrosion protection • Available in aerosol
	Standox Etching Adhesion Primer	<ul style="list-style-type: none"> • 2K acid primer • Excellent adhesion and corrosion protection • Chromate-free
Filler	Standox 2.1 Filler	<ul style="list-style-type: none"> • Exceptionally fast air-dry qualities • Excellent sanding properties • VOC-compliant for all areas
Sealer	Standox 2K HS Sealer	<ul style="list-style-type: none"> • Wet-on-wet sealer for VOC-regulated areas • Chromate-free
Single Stage	2K HS Standocryl®	<ul style="list-style-type: none"> • High mechanical and chemical resistance • Excellent opacity • Low-VOC technology
Basecoat	Standox Basecoat	<ul style="list-style-type: none"> • Excellent color accuracy • Easy to blend • Excellent coverage
Topcoat (select one)	Standocryl 2K HS Clear	<ul style="list-style-type: none"> • Excellent mechanical and chemical resistance • High-solid, low-VOC technology • Outstanding vertical hold-out
	Standocryl 2.1 Clear	<ul style="list-style-type: none"> • Special 2.1 Clear for VOC-compliant paint systems in California

Standox® 1K and 2K systems for preparing and painting new and unprimed plastic parts.

Standoflex® Systems

System Component	Key Product(s)	Characteristics
Cleaner (select one)	Standoflex Thinner 11100 <i>For 1K system</i>	<ul style="list-style-type: none"> • Cleaning of bare plastic substrates • Thinner for Standoflex Plastic Filler
	Standoflex Plastic Cleaner Antistatic <i>For 2K system</i>	<ul style="list-style-type: none"> • Cleaning of bare plastic substrates • VOC-compliant for those areas with plastic cleaner limits
Stopper	Standohyd® Sanding Paste	<ul style="list-style-type: none"> • Water-thinnable • Silicone-free • Excellent for bare plastic
Primer (select one)	Standoflex Plastic Primer <i>For 1K system</i>	<ul style="list-style-type: none"> • Ready to spray • Wet-on-wet overcoatable with Standoflex Plastic Filler
	Standoflex 2K Plastic Primer Surfacer <i>For 2K system</i>	<ul style="list-style-type: none"> • 2K primer surfacer for plastics • Easy to apply • Simple mixing ratio
Filler	Standoflex Plastic Filler <i>For 1K system</i> <i>No filler for 2K system</i>	<ul style="list-style-type: none"> • 1K filler for plastic priming • Easy to apply • For use over Standoflex Plastic Primer
Single Stage	2K HS Standocryl®	<ul style="list-style-type: none"> • High mechanical and chemical resistance • Excellent opacity • Low-VOC technology
Basecoat	Standox Basecoat	<ul style="list-style-type: none"> • Excellent color accuracy • Easy to blend • Excellent coverage
Topcoat (select one)	Standocryl 2K Clears	<ul style="list-style-type: none"> • High mechanical and chemical resistance • Available in high gloss and satin gloss
	Standocryl 2K Clear with Standox 2K Plasticiser	<ul style="list-style-type: none"> • Universal plasticiser for MS and HS topcoat systems • High, long-term elasticity

Standox® 2K system for repairing primed plastic parts.

Standoflex® 2K System

System Component	Key Product(s)	Characteristics
Cleaner	Standoflex Plastic Cleaner Antistatic	<ul style="list-style-type: none"> • Cleaning of bare plastic substrates • VOC-compliant for those areas with plastic cleaner limits
Primer	Standoflex 2K Plastic Primer Surfacer	<ul style="list-style-type: none"> • 2K primer surfacer for plastics • Easy to apply • Simple mixing ratio
Filler (select one)	Standox 2K Nonstop Primer Filler	<ul style="list-style-type: none"> • Outstanding isolation properties • Sanding/isolating filler • Chromate-free
	Standox 2.1 Filler	<ul style="list-style-type: none"> • Exceptionally fast air-dry qualities • Excellent sanding properties • VOC-compliant for all areas
Single Stage	2K HS Standocryl®	<ul style="list-style-type: none"> • High mechanical and chemical resistance • Excellent opacity • Low-VOC technology
Basecoat	Standox Basecoat	<ul style="list-style-type: none"> • Excellent color accuracy • Easy to blend • Excellent coverage
Topcoat (select one)	Standocryl 2K Clears	<ul style="list-style-type: none"> • High mechanical and chemical resistance • Available in high gloss and satin gloss
	Standox 2K Clear with Standox 2K Plasticiser	<ul style="list-style-type: none"> • Universal plasticiser for MS and HS topcoat systems • High, long-term elasticity

The systematic way to a perfect finish

Inside our Customer Service Center.

The dedicated Standox staff at our North American headquarters near Detroit offers technical support, recommendations on color formulas and general assistance. Our color professionals have diverse experience in the collision repair business, color information and formulations, information systems, and legislative and regulatory issues.

An experienced field team.

Our field staff has been carefully selected for their real-world body shop experience and their skill as painters. However, in today's collision industry, back-of-the-shop knowledge isn't enough. That's why we supplement their skills with shop management training from Masters School of Autobody Management®. Our technicians understand both business and process.

Certification for the future.

Standex training offers a full range of technical and product training for both collision repair facilities and distributors. Classes are designed to take collision repair professionals to the next level in their careers. Certification classes consist of performance-based training and education processes that improve knowledge and productivity.
